

# FrontUQ 2024

Workshop on Frontiers of Uncertainty Quantification in Engineering

September 24-27, 2024 Braunschweig, Germany

This is the short version of the booklet. A full version with all abstracts can be downloaded at https://www.frontuq-2024.com/ with password *UQ4aero.2024*.

If you would like to receive the book of abstracts in print, please indicate this here and collect it later at the reception desk.

The open-source LATEX template, AMCOS\_booklet, used to generate this booklet is available at https://github.com/maximelucas/AMCOS\_booklet

#### **About**

After a break during the Covid-19 pandemic, the FrontUQ workshop series will resume in 2024. The 4th edition will take place September 24-27 2024 in Braunschweig and will feature the topic "Uncertainty Quantification (UQ) for Aerospace Engineering". It is jointly organized by groups of TU Braunschweig, Karlsruhe Institute of Technology and the German Aerospace Center.

UQ has a long tradition in aerospace engineering and is gaining momentum again with the current research emphasis on Certification by Analysis. The workshop aims to bridge the gaps between the uncertainty quantification and aerospace communities. The first day puts special emphasis on UQ software, with multiple UQ software projects presenting themselves in hands-on tutorials.

Contributions featuring mathematical method development, applications in aerospace engineering and new approaches to UQ software design are welcome.

Topics of interest include but are not limited to:

- Efficient uncertainty propagation
- Estimation of model form error
- Advanced methods for the estimation of failure probabilities
- Surrogate modeling and error estimation
- Imprecise probability models
- UQ approaches suitable for multi-disciplinary problems
- Robust design and optimization
- Scalable UQ techniques that are applicable to industrial grade problems
- Data-driven approaches and UQ
- Software for UQ

#### **Keynote Lectures**

- Raúl Tempone, Alexander von Humboldt Professor, Mathematics for Uncertainty Quantification Chair, RWTH Aachen University and Applied Mathematics, King Abdullah University of Science and Technology
- Richard Dwight, Professor at the Faculty of Aerospace Engineering, TU Delft
- Elisabeth Ullmann, Professor of Scientific Computing and Uncertainty Quantification, TUM
- John Schaefer, Boeing Designated Expert in Uncertainty Quantification, Boeing
- Bojana Rosic, Professor and Head of the Applied Mechanics and Data Analysis Group, ET Faculty, University of Twente
- Richard Butler, Professor of Aerospace Composites, University of Bath

FrontUQ is a workshop of the GAMM Activity Group on Uncertainty Quantification https://gamm-ag-uq.github.io/index.html.

#### **Organizing committee**

Philipp Bekemeyer (German Aerospace Center) Sebastian Krumscheid (KIT) Ulrich Römer (TU Braunschweig)

Linus Seelinger (KIT)

#### Scientific committee

Andrea Barth (University of Stuttgart) Stefan Görtz (German Aerospace Center) Ulrich Römer (TU Braunschweig) Linus Seelinger (KIT)

Philipp Bekemeyer (German Aerospace Center) Sebastian Krumscheid (KIT) Laura Scarabosio (Radboud University) Lorenzo Tamellini (CNR-IMATI Pavia)

## **Timetable**

CT: Contributed Talk, SC: Software Contribution, KL: Keynote Lecture.

### Tuesday, 24 of September - Software Day

8:45-9:00		Regi	stration
09:00-10:00	SC	<b>L. Seelinger</b> KI⊤	Introduction to UM-Bridge and Software-Tools
10:00-10:30	SC	L. Seelinger KI⊤	UQ Problem used for Tutorials
10:30-11:00		Coffe	ee Break
11:00-12:00	SC	<b>N. Lüthen</b> ETH Zürich	Uncertainty Quantification with UQLab and UM-Bridge
12:00-13:00		L	unch
13:00-14:00	SC	<b>C. Piazzola</b> Technical University of Munich	The Sparse Grids Matlab KIT
14:00-14:30		Coffe	ee Break
14:30-15:30	SC	<b>S. Dolgov</b> University of Bath	TT Toolbox
15:30-16:00		Coffe	ee Break
16:00-17:00	SC	C. Krill Johns Hopkins University	UQpy 4.2: Scientific Machine Learning

## Wednesday, 25 of September

08:00-08:15	Registration		
08:15-08:30	Opening		
08:30-09:30	KL	<b>J. Schaefer</b> Boeing	Industry Perspective on UQ to Enable High-Fidelity Predictive Modeling for Aerospace Design and Analysis
09:30-10:00		Coffe	e Break
10:00-10:30	СТ	<b>D. Di Francesco</b> The Alan Turing Institute	Towards Risk-Optimal Certification by Analysis
10:30-11:00	СТ	<b>L. Werthen-Brabants</b> Ghent University	Towards Trustworthy Neural Networks for Certification by Analysis - Fuel Tank Flammability Reduction System
11:00-11:30	СТ	<b>J. Unger</b> BAM	Uncertainty Quantification and Model Extension for Digital Twins through Model Bias Identification
11:30-12:00	СТ	<b>D. Valente</b> DLR	Provenance-Driven Framework for Robust Aerospace System Performance
12:00-13:00		Lı	unch
13:00-14:00	KL	<b>R. Tempone</b> RWTH Aachen and KAUST	Stochastic Optimization: Adaptive Variance Reduction and Bayesian Quasi-Newton Methods
14:00-14:30	СТ	<b>T. Zhou</b> Chinese Academy of Sciences	Information Bottleneck based Uncertainty Quantification
14:30-15:00	СТ	<b>J. Dölz</b> Universität Bonn	On Uncertainty Quantification of Eigenvalues and Eigenspaces with Higher Multiplicity
15:00-15:30	СТ	<b>B. Kent</b> CNR-IMATI	Adaptive-in-Time Stochastic Collocation Approximation for Parametric Parabolic PDEs
15:30-16:00	Coffee Break		
16:00-16:30	СТ	<b>J. Parekh</b> DLR	Identification and Handling of Uncertainties in Computational Aerodynamics
16:30-17:00	СТ	<b>S. Baars</b> TU Braunschweig	Thompson Sampling and Partitioned Surrogates for Multidisciplinary Design Optimization
17:00-17:30	СТ	<b>M. Alder</b> DLR	Probabilistic Technology Assessment of Complex Transportation Systems
18:30		Dinner a	t LaCupola

## Thursday, 26 of September

08:30-09:30	KL	<b>R. Dwight</b> TU Delft	Statistical Methods for Generalizable Data-Driven Turbulence Modelling
09:30-10:00	Coffee Break		
10:00-10:30	СТ	<b>F. Lößle</b> DLR	Uncertainty Quantification in Aircraft Noise Calculation: Current Status and Challenges at DLR
10:30-11:00	СТ	<b>H. Geisler</b> Leibniz University Hannover	A New Paradigm for Engineering Simulations Under Uncertainties: Time-Separated Stochastic Mechanics
11:00-11:30	СТ	<b>J. Bachner</b> DLR	Uncertainty Propagation for Multi-Hole Pneumatic Probes in Turbomachinery Flows
12:00-13:00			unch
13:00-14:00	KL	<b>E. Ullmann</b> Technical University of Munich	Rare Event Estimation with PDE-based Models
14:00-14:30	СТ	<b>E. Løvbak</b> KIT	Markov Chain Monte Carlo for Particle Solvers
14:30-15:00	СТ	<b>P. Hristov</b> GATE Institute	Backcalculation for Design Under General Uncertainty: An Introduction and a Tutorial
15:00-15:30	СТ	<b>K. Tüting</b> TU Braunschweig	A Modeling Perspective on Tracing Uncertainties in Dynamic Systems
15:30-16:00	Coffee Break		
16:00–16:30	СТ	<b>D. Pölzleitner</b> DLR	Feature and Extrapolation Aware Uncertainty Quantification for Al-based State Estimation
16:30-17:00	СТ	<b>N. Dridi</b> Femto ST	Uncertainty Quantification Using Bayesian Neural Networks
17:00-17:30	СТ	<b>D. Tyagi</b> BAM	Damage Localisation and Quantification from Modal Data using Sparsity Promoting Priors

## Friday, 27 of September

08:30-09:30	KL	<b>R. Butler</b> University of Bath	Certification for Design: Re-shaping the Testing Pyramid for Composite Aerostructures
09:30-10:30	KL	<b>B. Rosic</b> University of Twente	Stochastic Modelling of Composite Material Anisotropy and Surrogate Modelling
10:30-11:00		Coffee Break	
11:00-11:30	СТ	<b>V. Narouie</b> TU Braunschweig	Polynomial Chaos-based Statistical Finite Element Analysis with Non-Conjugate Prior
11:30-12:00	СТ	<b>F. Zacchei</b> Politecnico di Milano	Multi-Fidelity Delayed Acceptance for PDE Inverse Problems with Progressive Neural Network Surrogates
12:00-12:30	СТ	<b>D. Anton</b> TU Braunschweig	Statistical Calibration of Constitutive Models from Full-Field Data Using Physics-Informed Neural Networks
12:30-13:00	12:30–13:00 <b>Lunch</b>		
13:00-16:00	Visit of Aerospace Facilities

#### **Practical Information**

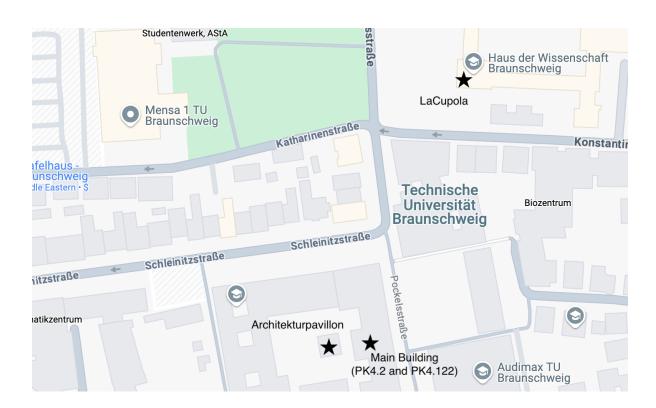

The **workshop** will primarily take place at the *Architekturpavillon* of TU Braunschweig, located within the main building. It is accessible from both the ground and first floors.

The **Software Day** will begin in the *Architekturpavillon* and continue with hands-on exercises in Rooms PK 4.122/PK 4.117 on the first floor.

**Coffee breaks and lunch** will be served in room PK4.2, also on the first floor of the main building, and the *Architekturpavillon*.

**WiFi** (eduroam) will be available throughout the conference. For attendants without eduroam access, Guest WiFi accounts will be provided at the Conference Desk.

The **conference dinner** will be hosted on Wednesday, 25th of September at 18:30, at "LaCupola", located in the Haus der Wissenschaft, Pockelsstraße 11, 38106 Braunschweig.

## **Sponsors**

We are grateful for the support of:

- TU Braunschweig
- KIT Karlsruher Institut für Technologie
- German Aerospace Center (DLR)
- Center for Mechanics, Uncertainty and Simulation in Engineering (MUSEN)
- Cluster of Excellence: Sustainable and Energy Efficient Aviation (SE<sup>2</sup>A)
- CRC: Synergies of Highly Integrated Transport Aircraft (SynTrac)
- GAMM UQ Activity Group
